

High-End Mobile Generator Trolleys

Effortless Transport Solutions Built Tough for Industrial Power Equipment

Why Choose Our Logistics Systems?

Need to transport heavy diesel generators across rugged terrain or workspace floors? Our high-grade generator trolleys function as the perfect heavy-duty mobile base for your power investment, eliminating structural stress and workspace lifting hazards.

Maximum Plant Safety: Our customized chassis platforms isolate generators from ground dampness, absorb engine vibrations during active runtime cycles, and safeguard external canopies against unexpected transport scratches and impact damage.

Premium Operational Benefits

- **Competitive Pricing:** Top-tier welding quality optimized at affordable rates.
- **Rugged Durability:** Engineered exclusively with reinforced structural channel frames.
- **Flexible Logistics:** Readily available for purchase or convenient short-term rental plans.
- **Expert Technical Support:** On-call consultation ensuring perfect matching compatibility.

Product Range - Model I

INDUSTRIAL TWO-WHEELER TROLLEY

Stable Ground Footing: Features heavy-gauge integrated support stanchions that firmly ground the equipment during stationary power generation phases.

Heavy Logistics - Model II - Four-Wheeler System

For heavy industrial deployment and larger multi-cylinder diesel gensets, our steerable four-wheeler trailers offer unmatched towing tracking stability and balanced axle load weight distribution.

INDUSTRIAL FOUR-WHEELER TROLLEY

Technical Data & Material Quality Standards

| Engineering Parameters | Certified Output Specification Values |
|-----------------------------|--|
| Chassis Structural Material | High-Tensile Structural Carbon Steel (Corrosion Resistant Primer Treated) |
| Maximum Load Capacity | Up to 300 Kgs / 0.3 Metric Tons Rated Payload Comfortably |
| Tow Handle Control Linkage | Articulated Tow-Bar with High-Density Shock Absorbing Rubber Grip Lining |
| Mobility Systems | All-Terrain High-Traction Pneumatic Radial Tires with Integrated Shock Dampers |
| Application Deployment | Industrial Facilities, Temporary Power Hubs, Agriculture Farms & Residential Complexes |

Operational Execution Model (GGPS Advantages)

- ♦ **Highly Skilled Engineering Staff:** All welding, load balance profiling, and stress evaluations are performed by precision technicians.
- ♦ **24x7 Customer Support Line:** Operational breakdown response and emergency logistical support are standing by round the clock.
- ♦ **Turnkey Site Logistics:** Your customized structural order is dispatched and safely dropped directly at your specific venue address.
- ♦ **India's Leading Rental Provider:** Providing clean, dependable prime-power machinery rentals packaged alongside premium fleet trailer support.
